## **Renaissance Las Vegas Chooses Covad High-Speed Wireless Broadband**

**San Jose, Calif. (Feb. 14, 2007)** – Covad Communications Group, Inc. (AMEX: DVW), a leading national provider of integrated voice and data communications, announced today that Renaissance Las Vegas, a AAA-rated 4-Diamond hotel in downtown Las Vegas, has selected Covad's wireless broadband service for their business needs.

The Renaissance Las Vegas chose the NextWeb HiCap service to fulfill their Internet access needs. The service – which provides up to 100 Mbps of bandwidth – was originally ordered to supply bandwidth to the hotel. Hotel General Manager Tom Xavier, however, was so satisfied with the service that he decided to keep it on a permanent basis.

"We require a large amount of bandwidth on a 24-hour basis for our business to function and meet our guests' needs," said Xavier. "Covad was easy to work with and quickly implemented the successful broadband solution."

"We are pleased the Renaissance Las Vegas chose Covad for its business needs," said Pat Bennett, Covad executive vice president market development. "Our competitively priced service offerings are simple to understand and easy to implement, which can result in immediate cost-savings. Ultimately, our solutions enable business owners to focus on growing their businesses instead of worrying about technology choices."

Covad offers high-speed broadband wireless to over 3500 businesses in five markets nationwide: Chicago, Los Angeles, Las Vegas, Orange County and San Francisco.

With five base station towers, located at Harrah's, Bank of America, Rio, Sunrise Peak and Black Mountain, Covad has the ability to provide high-speed broadband wireless service to most of the Las Vegas Valley.

Covad offers a complete portfolio of cost effective telecom solutions that businesses require. To learn more about Covad's services, please log onto <http://www.covad.com> or call 1-866-292-4848.
