## **Covad Wireless Teams Up With Motorola to Provide Wireless Internet Access at LA's Largest Mixer IX at Shrine Auditorium**

**Los Angeles – July 24, 2007** – Covad Wireless, a subsidiary of Covad Communications Group, Inc. (AMEX: DVW), a leading national provider of integrated voice and data communications, said today it is teaming up with Motorola to provide wireless Internet access to attendees at **L.A.'s Largest Mixer IX**, 5 p.m. to 9 p.m., Thursday, July 26, at the Shrine Auditorium Expo Center.

All that attendees need to do to stay connected to the Internet throughout the evening is to bring their WiFi (802.11 B/G)-capable computers or PDAs. Covad Wireless is bringing more than five megabits of wireless Internet access to the Shrine Auditorium, where Motorola will wirelessly distribute the bandwidth through its WiFi (802.11B/G) network consisting of multiple access points strategically placed inside the auditorium.

Users can easily connect to the combined Covad Wireless/Motorola network the same way they connect at home, at work or at hot spots throughout the greater Los Angeles area.

Sponsored by 30 Los Angeles County chambers and business organizations, L.A.'s Largest Mixer IX attracts hundreds of exhibitors for a business-networking event that allows business people to mix and mingle with representatives of hundreds of industries and companies in and around Los Angeles County.

L.A.'s Largest Mixer IX is a great opportunity for business people to reach small to large companies, meet new clients and learn how the different chambers of commerce and business organizations can make their businesses grow. And using the Covad Wireless/Motorola network, they can follow through immediately in scheduling meetings or conferences, providing more detailed product information or even beginning to process sales orders.

Covad Wireless is using its Special Event Service to deliver more than five megabits of Internet access to the Shrine Auditorium. Covad Wireless' event service is popular with event planners due to its ability to be provided for a short period of time (usually 1 to 10 days) and installed quickly. In the metro Los Angeles area, Covad Wireless can provide up to 45 megabits of symmetrical (upload and download) bandwidth in selected areas from Santa Barbara to Santa Ana and can be delivered and installed in days rather than weeks.

Covad Wireless, formerly known as NextWeb, Inc., operates one of the nation's largest fixed broadband wireless networks focused on serving business customers. Its solutions range from T1 replacement to high-capacity service with data speeds of up to 100 Mbps. In addition to serving customers in the greater Los Angeles area, Covad Wireless serves over 4,000 small and medium-sized businesses in the San Francisco Bay Area, Chicago suburbs, and Las Vegas. For more information on Covad Wireless services, please visit [www.covadwireless.com](http://www.covadwireless.com) or call 1-866-805-1630.
